

Backflow Certification

BACKFLOW PREVENTION TESTERS CERTIFICATION COURSE - \$575.00

Any person wanting to be certified as a Backflow Prevention Tester must have attended and successfully completed an approved comprehensive training program, such as our Backflow Prevention Testers Certification Course . This course is 32 hours of classroom and "hands-on" laboratory training, and has been approved by all the municipalities in Florida as well as anywhere in the United States.

WHO SHOULD ATTEND? The advanced plumbing apprentice, journeyman, plumbing & fire protection contractors, wastewater professionals, irrigation & landscaping specialists, and maintenance personnel, builders/developers etc.

Course Objectives: You must be able demonstrate the proper field test procedures for: RP (Reduced Pressure) principle, DCVA (Double Check Valve Assembly), the PVB (Pressure Vacuum Breaker), and the AVB (Atmospheric Vacuum Breaker) as well as many other concepts.

If you are a Fire Sprinkler Contractor or a Plumbing Contractor you will receive 32 hours of continuing education credits approved by the DPBR for your contractor's license renewal as well. You must be present the entire course to receive CEU's and our Certificate. Please provide a copy of your drivers license, contractor license and student # to receive CEUs.

Please Click Here to download the application, fill it out on your computer (we do not accept handwritten applications, and email it back to the following: www.floridaplumbingandbackflow@gmail.com.

As a last resort you may send to our fax (after you complete it on your computer)...to 561 364 7051.

Thank you, Karyn McInerney - Director- 561 254-4625

Our Next Class is scheduled for September 9, 10, 16 & 17, 2017
